

QPS BENCHMARKING

NEXT GENERATION REPORTING

Identify and understand high performance & high risk areas in your organisation with our custom set of online, next generation tools.

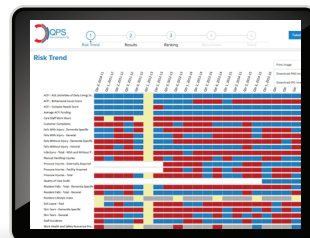

WE TURN YOUR DATA INTO INFORMATION

Collecting and turning data into information is a time consuming and difficult job. Where do you start? What tools should you use? How will you verify the accuracy of your data or the suitability of your information? Did you know that data in itself is fairly useless, until it is interpreted or processed to provide meaning?

By leveraging our; Technology, Expertise, Experience and Group Membership Strength your organisation will be on the path to information based decision making.

Verified by an independent 3rd party, use for accreditation & compliance, corporate governance, performance management & quality improvement, risk management.

ADVANCED SERVICE REPORT

The Service Report is highly interactive and designed to allow managers at the business unit level to easily understand the performance of the service and identify high risk areas.

Easily produce custom reports for use in accreditation, presentations and board reports.

ADVANCED CORPORATE REPORT

The Corporate Report streamlines your reporting processes and allows the executive team to quickly identify both your best performing and highest risk business unit's.

Advanced reports include personal & computational feedback to help users interpret their results, plan corrective actions and close the quality cycle.

Our reports are custom built by our IT team, with specific design and functionality created to make your job easier. Hosted on our top tier servers, you can access and interact with your report anywhere, anytime.

Automated Data Transfer

We work with your other software providers to create an automated data flow that accurately and efficiently populates your reporting

WE BELIEVE IN DATA ACCURACY & EFFICIENCY

We are your data scientists, who assess whether your data is considered safe to use before we accept that it will be added to our databases and used for reporting. Your data will go through two of our gold standard scrubbing systems before it is accepted, one driven by algorithms and a second by our trained staff who ensure your results make sense.

We can also provide the highest level of technical support to assist you in migrating data from other software and systems, so that you can save time and ensure safe handling of your data at all levels. We provide the highest level of server hosting and security as well as support from our experienced team so that you can trust that your data is in the best hands.

SURVEY

Our industry specific surveys can provide you with key insights from the most important extensions of your organisation - people. Expertly researched, developed, field tested and regularly revised, our surveys cover groups such as staff, clients/customers and family. You can either, simply use our surveys or allow us to manage the entire survey process for you.

AUDIT

We can provide you with quality audits that will ensure that your quality system is sound and will provide visibility and insights to help raise safety and quality standards across an organisation. Our audits will assist you in gaining visibility over your operations. Boards and management can have their finger on the pulse to ensure all areas of your organisation are compliant. By adopting the QPS system, you can allow your staff to work as efficiently as possible. Implementation is easy and adoption is pain-free.

REPORT

By bringing all of these elements together, we provide you with a live and interactive reporting system driven by leading technology platforms. We give you the power to output customised reports at the click of a button, so that you can meet all of your organisations reporting needs. Make your organisation truly data driven.

We provide evidence based criteria and data collection tools so that your organisation can save time and money, while ensuring that your reporting is valid
