NQI APP

Collecting, managing and submitting data for the National Aged Care Mandatory Quality Indicator Program is complex and time consuming. Our solution takes away the guess work and ensures that your staff are collecting perfect data every time. Resident level compliance and multi site progress management give you peace of mind at every level.

DIGITAL AUDIT SYSTEM

A key goal of digital transformation in health is to put leading edge technology in the hands of carers, so that care can be delivered more efficiently and accurately. Our fully digital audit system will revolutionise the way your organisation completes, tracks, manages and reports on audits. Standards compliance and corrective actions are included. The future of auditing has arrived.

CORPORATE & SERVICE REPORTING

Our expertise in technology and data ensures that your data is accurate and safe. We feed your clean data into our live and customisable reporting platform, so you can easily create reports at the touch of a button for any type of audience. Our reports save you time and provide visibility of risks and performance across your entire organisation.
